Detailed client reconciliation and database configuration catalogue

Database: sgcs_care
Snapshot: 2026-09-08 03:59:33
Classification: Confidential – Client Review

Sensitive credentials and unrelated application data are intentionally excluded.

1. Executive Summary

The live database contains 168 claims. 89 claims are explicitly tagged across 8 controlled migration/reconciliation batches. Tagged claims include both new inserts and existing rows reused or corrected to prevent duplicate limit deductions.

Metric	Value
Staff categories	5
Insurance policies	5
Policy/staff periods	14
Treatment limits	78
Quarter/category limits	155
Migration-tagged claims	89
Excluded/not-added cases	9

2. How to Read the Limits

Policy period is the configured year/window for a staff category. Global limit is the treatment ceiling. Quarter/category limits stage OTHER eligibility or define DENTAL/SPECTACLE sublimits. Approved usage is calculated from approved_amount only. The application selects staged eligibility using employee permanent date; employees permanent before the policy use the first eligible window.

7.4 Duplicate Avoidance

Claims already present with the same employee, policy, treatment and approved value were reused and marked. Aggregate rows were retained or split only where category accuracy required it. This prevented double deduction of limits.

9. Data Quality and Follow-up

Validation check	Observed count
Approved claims missing approved amount	0
Approved claims missing a limit reference	0
Approved claims with stored period different from attached limit	15
Approved quarter-enabled claims without quarter reference	25
Approved claims whose quarter does not match limit/category	0
Duplicate request IDs	0
Employee/limit approved totals above global limit	0

A non-zero observation requires controlled review but does not automatically mean an approved amount or current balance is wrong.

9.3 Recommended Follow-up

1. Review the 15 legacy period-reference differences in a separate transaction. 2. Populate the 25 missing quarter references after validating historical policy eligibility. 3. Preserve migration markers and this report. 4. Re-run all validation checks after future migrations.

10. Scope and Assurance

Sources: live sgcs_care insurance/claims tables, Outdoor.xlsx, indor.xlsx, approved balance sheets and recorded client decisions. Report generation used SELECT-only database access. This is a point-in-time snapshot and should be regenerated after material policy or claim changes.
